Summary

Software Developer with **4 years** of experience specializing in backend development using **Node.js** and Express.js. Experienced in building scalable RESTful APIs, server-side applications, and database solutions. Skilled in API design and database optimization. Passionate about building scalable, high-performance applications and delivering efficient backend solutions.

Skills

Backend Development: Node.js, Express.js, JavaScript, RESTful APIs, API Design, MVC Architecture

Databases: MongoDB, MySQL, Query Optimization, Schema Design, Database Optimization

Frontend (Working Knowledge): HTML, CSS, jQuery, Angular

Tools: Postman, Swagger, MongoDB Compass, phpMyAdmin, VS Code

Version Control: Git, GitHub

Project Management & Collaboration: Jira, ClickUp, Monday.com, Trello, Slack, Microsoft Teams

Web Servers: Apache, Nginx

Deployment Tools: PM2, PuTTY, FileZilla

Cloud & Hosting (Working Knowledge): AWS, Azure, Google Cloud Platform, cPanel

Work Experience

Carina Softlabs Inc.

November 2024 – May 2025

Full Stack Developer

- Developed and maintained RESTful APIs and admin panel functionalities.
- Optimized application performance to support scalability and reliability.
- Implemented functionalities to enable efficient data processing and communication between systems.
- Collaborated with cross-functional teams to deliver business requirements and application features.

Pixler IT Solution Pvt Ltd

July 2021 - November 2024

Software Developer

- Developed and maintained web applications to support diverse business requirements and client needs while ensuring reliable system performance and maintainability.
- Implemented RESTful APIs to enable efficient data exchange and application functionality.

Ypsilon IT Solutions Pvt. Ltd.

February 2021 - July 2021

Trainee Software Developer

- Completed training as a Software Developer, gaining practical experience in software development.
- Assisted in project development and application functionalities during training.

Projects

Popil Tunes - MP3 Music Application & OTT Platform

- Developed a music application with an integrated OTT section, featuring MP3 songs, videos, movies, and web series.
- Implemented functionality for users to create and share karaoke clips and connect with other users.

Millionaire Mind Games - Mobile Game Application

- Developed and implemented backend APIs for the game application and admin panel, enabling seamless gameplay and points tracking.
- Managed user data, game progress, and point redemption through efficient backend integration.

Technical Supplies (TECS) - An internal enterprise solution integrating HRMS, CRM, and other modules.

- Developed and enhanced functionalities across HRMS, CRM, Overtime, Cafeteria, and other modules.
- Designed and implemented APIs while optimizing database performance and enhancing schema design for efficient data storage and retrieval.

Arabiansathome - A social app connecting Arabian horse enthusiasts and experts.

- Developed APIs for a mobile application and admin panel, while creating a user-friendly admin interface and integrating cloud-based services for optimized data storage.
- Implemented database schema design and optimization strategies to enhance data retrieval speed and overall system efficiency.

Education

Bachelor of Engineering – Sagar Institute of Research and Technology, Indore (M.P.)
June 2014 – June 2018

Languages

- Hindi – Native
- English – Working Proficiency
